Abstract

This thesis aims to study the Qur'anic sentences in which the word (human) is mentioned as a linguistic study, as it is concerned with a linguistic study whose field is the Holy Qur'an and its main focus is (human). To show many aspects related to man, such as his creation, attributes and actions, for he is the living being whom God Almighty has honored and preferred over many of his creatures and distinguished him from him. The research consisted of two chapters, preceded by a preface that included the definition of the title's vocabulary, followed by the first chapter, which was titled: (Resources of the word human in phrasal verbs), and was divided into four sections, the first came under the title: (Resources of the word human in phrasal verbs in the past), and the second So it bore the title: (Resources of the word human in the infinitive in the present tense), the third was entitled: (Resources of the word human in conditional sentences), and the fourth was entitled: (Resources of the word human in the predicate sentences). As for the second chapter, it was titled: (Word resources Man in Nominal and Abrogated Sentences), and it was also divided into four sections, so the first title was: (Resources of the word human in nominal sentences), the second: (Resources of the word human in the abrogated sentences with was and its sisters), and the third: (Resources of the word human in the copied sentences with that And her sisters) As for the fourth topic, entitled: (B) The resources of the human word in the sentences abrogated by Think and its sisters. This was followed by tables of verses containing the word human and a conclusion that included the most prominent results reached by the research, and the research ended with a confirmation of the sources and references that were relied upon in the research
