أحمد فكاك أحمد البدراني

المستخلص

لقد سعت الاقليات العراقية إلى تحقيق طموحاتها المشروعة من خلال ممثليها في البرلمان العراقي، على اعتبار العضو البرلماني مسؤول اخلاقيا وقانونيا عن تلبية طلبات جماهيره . وجاء هذا السعي بعد التغيير الجذري الذي شهده العراق عقب عام ٢٠٠٣، المتمثل بالانتقال الى النظام الديمقراطي والتعددية السياسية .

لكن من الملاحظ أنّ الاداء البرلماني للنواب الذين يمثلون الاقليات لم يؤت ثماره بعد، حيث واجه تحديات كبيرة ، ومنها : ان عملية وضع الكوتا للمكونات الاقل عددا قد حجّمت مشاركة الكفاءات العلمية والثقافية والاجتماعية ما لم تكن جزءاً من احزاب سياسية، وهذا يعني حرمان الاقليات وفي الوقت عينه حرمان البرلمان الاتحادي من الخبرات التي كان وجودها سيعمل على تحقيق اضافة نوعية للأداء البرلماني والتشريعي، ما ينعكس ايجابياً على القوانين والتشريعات الصادرة التي من المفترض ان يكون للاقليات نصيب منها.

ويمكن اضافة اسباب اخرى ادت الى ضعف اداء نواب الاقليات وهي تندرج في أنّ اختيار النائب ضمن القوائم المغلقة جاء ببعض الشخصيات محدودة العطاء، ومفروضة على أبناء المكوّن.

وقد اثبتت الوقائع أنّ بعض أعضاء مجلس النواب لم يكن يعمل إلا لصالحه من أجل بناء الثراء واحراز النفوذ الذي يعزّز استمراره في عضوية المجلس لدورات لاحقة وهذا غير خفي، إذ لوحظ وجود بعض الشخصيات في دورات عديدة.

Abstract

Iraq has undergone through the history of many confrontation have spread its influence over its land and its tourism . Mesopotamia is an inexhaustible source of good in which the tigris and Euphrates , the fertility of its land and sweetness of its climate ,as well as being the link between turkey in the north and the Arabian gulf in the south .

It mediates between Persia in the east and the Arab counteies ,and as result , the population of Iraq has diversified including the Arabs who from the majority followed by the kurds ,then the Turkmen .

They are all of those who convert to Islam with its two schools of thoughts.

There are other components that share the home land,such as,the christians who preceded the muslim in there presence in the land of Mesopotamia .

Some sources indicate that they are the original inhabitants of Iraq before the successive migrations as well as the Yazidis who are distributed between Sinjar north west of Nineveh gover norate and other areas between nineven and dohuk governorate and other such as sheikhan and other villages affiliated to it .

Chisians share the shabak in the Nineveh plain area , as for the shabaks,are neighboring the christians and yazidis ,as mentioned above .

There are other components of a small number ,such as kakiya,sabian, and AL-Bajwan,which are distributed in many villages east of mosul .After the year 2003 and the events that took place as political system extended his hand over the cities and their dependents.some components tried to get gains when a political vacuum occurred .So it rushed toward the political process by gaining a foothold for it . This was helped by the relaxation of the political reality under the administration of Ambassador paul Bremer,who played a negative role

in tearing the Iraq social fabric by dissolving some ministries and security institutions. then chaos reigned and his bad work culminated in the heresy of quotas in order to kill identity and encourage the development of sub-identities .

The quota system ,which worked in its two parts, of parliamentary and the quota of the minority component in order to introduce this on the ground .Some of these components sought to achieve additional representation in parliament through their participation with political parties ,so it has more than one deputy in one session and this makes the opinions and aspirations of the component through the other deputy depended on the party's interest far from the components interest . the process of establishing the quota system for the component reduced the participation of scientific , cultural and social competencies unless they are part of political parties , and this means depriving the parliament of certain competencies whose existence might work to achieve a qualitative addition to the parliamentary appearance ,which is positively reflected in the laws and legislations issued .

Many of these components are not believing in quotas and they think they are absent . Perhaps we are certain to say that the absence of some representatives from our meeting is justified because there is nothing that can be added or declared ,because they did not present to their components what can be mentioned in the scientific thesis ,which is a source for scholars after its approval . And there is another issue that prevented them from disclosing that they were unable to describe their bid and that it first served the party's interest , then it turned to the interest of the country and its components as secondary . It is possible to add other results that we have come up with , which are included in the affliction test within the closed lists . some personalities have limited capabilities imposed on the component.

The facts proved that some members of the house of representatives did not work except for his benefit in order to build wealth and gain influence that strengthens his continuation in membership of the council for the subsequent sessions , and this is not hidden , as we noticed the presence of some people in many sessions .
